

Diesel Treatment

TOTAL Diesel Treatment cleans fuel supply systems and keeps them clean by cutting combustion residue in the engine's chamber and injection nozzles. Use on a regular basis to protect your engine's fuel supply circuit from corrosion and to inhibit deposit build-up in the tank. This additive improves diesel combustion and thereby helps lower consumption and cut polluting emissions.

Product & Conditioning

Pack	Can 250 ml
Pack color	Grey
Pack height	20,5 x 5 cm
Closure	28 mm cap with protector and child proof
Cap color	Black
Pack per box	12
Dimensions box	20,7 x 15,7 x 21,4 cm

Product Advantages

Cuts fuel over consumption

Smoothens engine start-up and eases mechanical stress

Removes deposits from the injection nozzles and combustion chamber

Cuts polluting emissions

Hazardous product.
Class 9 Codification UN 3082.

Cf. Technical data sheet and Material Safety Data Sheet.
